

What's Your Resilience Score? Resilience Questionnaire

Please circle the most accurate answer under each statement:

1. I believe that my mother loved me when I was little.

Definitely true Probably true Not sure Probably Not True Definitely Not True

2. I believe that my father loved me when I was little.

Definitely true Probably true Not sure Probably Not True Definitely Not True

3. When I was little, other people helped my mother and father take care of me and they seemed to love me.

Definitely true Probably true Not sure Probably Not True Definitely Not True

4. I've heard that when I was an infant someone in my family enjoyed playing with me, and I enjoyed it, too.

Definitely true Probably true Not sure Probably Not True Definitely Not True

5. When I was a child, there were relatives in my family who made me feel better if I was sad or worried.

Definitely true Probably true Not sure Probably Not True Definitely Not True

6. When I was a child, neighbors or my friends' parents seemed to like me.

Definitely true Probably true Not sure Probably Not True Definitely Not True

7. When I was a child, teachers, coaches, youth leaders or ministers were there to help me.

Definitely true Probably true Not sure Probably Not True Definitely Not True

8. Someone in my family cared about how I was doing in school.

Definitely true Probably true Not sure Probably Not True Definitely Not True

9. My family, neighbors and friends talked often about making our lives better.

Definitely true Probably true Not sure Probably Not True Definitely Not True

10. We had rules in our house and were expected to keep them.

Definitely true Probably true Not sure Probably Not True Definitely Not True

11. When I felt really bad, I could almost always find someone I trusted to talk to.

Definitely true Probably true Not sure Probably Not True Definitely Not True

12. As a youth, people noticed that I was capable and could get things done.

Definitely true Probably true Not sure Probably Not True Definitely Not True

13. I was independent and a go-getter.

Definitely true Probably true Not sure Probably Not True Definitely Not True

14. I believed that life is what you make it.

Definitely true Probably true Not sure Probably Not True Definitely Not True

How many of these 14 protective factors did I have as a child and youth? (How many of the 14 were circled "Definitely True" or "Probably True"?) _____

Of these circled, how many are still true for me? _____

"...This *What's Your Resilience* questionnaire was developed by the early childhood service providers, pediatricians, psychologists, and health advocates of Southern Kennebec Healthy Start, Augusta, Maine, in 2006, and updated in February 2013. Two psychologists in the group, Mark Rains and Kate McClinn, came up with the 14 statements with editing suggestions by the other members of the group. The scoring system was modeled after the ACE Study questions. The content of the questions was based on a number of research studies from the literature over the past 40 years including that of Emmy Werner and others. Its purpose is limited to parenting education. It was not developed for research..."

Information on Resilience from the American Psychological Association.

Factors in Resilience

A combination of factors contributes to resilience. Many studies show that the primary factor in resilience is having caring and supportive relationships within and outside the family. Relationships that create love and trust, provide role models and offer encouragement and reassurance help bolster a person's resilience.

Several additional factors are associated with resilience, including:

1. The capacity to make realistic plans and take steps to carry them out.
2. A positive view of yourself and confidence in your strengths and abilities.
3. Skills in communication and problem solving.
4. The capacity to manage strong feelings and impulses.

All of these are factors that people can develop in themselves.

10 ways to build resilience

1. **Make connections.** Good relationships with close family members, friends or others are important. Accepting help and support from those who care about you and will listen to you strengthens resilience. Some people find that being active in civic groups, faith-based organizations, or other local groups provides social support and can help with reclaiming hope. Assisting others in their time of need also can benefit the helper.
2. **Avoid seeing crises as insurmountable problems.** You can't change the fact that highly stressful events happen, but you can change how you interpret and respond to these events. Try looking beyond the present to how future circumstances may be a little better. Note any subtle ways in which you might already feel somewhat better as you deal with difficult situations.
3. **Accept that change is a part of living.** Certain goals may no longer be attainable as a result of adverse situations. Accepting circumstances that cannot be changed can help you focus on circumstances that you can alter.
4. **Move toward your goals.** Develop some realistic goals. Do something regularly — even if it seems like a small accomplishment — that enables you to move toward your goals. Instead of focusing on tasks that seem unachievable, ask yourself, "What's one thing I know I can accomplish today that helps me move in the direction I want to go?"
5. **Take decisive actions.** Act on adverse situations as much as you can. Take decisive actions, rather than detaching completely from problems and stresses and wishing they would just go away.

6. **Look for opportunities for self-discovery.** People often learn something about themselves and may find that they have grown in some respect as a result of their struggle with loss. Many people who have experienced tragedies and hardship have reported better relationships, greater sense of strength even while feeling vulnerable, increased sense of self-worth, a more developed spirituality and heightened appreciation for life.
7. **Nurture a positive view of yourself.** Developing confidence in your ability to solve problems and trusting your instincts helps build resilience.
8. **Keep things in perspective.** Even when facing very painful events, try to consider the stressful situation in a broader context and keep a long-term perspective. Avoid blowing the event out of proportion.
9. **Maintain a hopeful outlook.** An optimistic outlook enables you to expect that good things will happen in your life. Try visualizing what you want, rather than worrying about what you fear.
10. **Take care of yourself.** Pay attention to your own needs and feelings. Engage in activities that you enjoy and find relaxing. Exercise regularly. Taking care of yourself helps to keep your mind and body primed to deal with situations that require resilience.
11. **Additional ways of strengthening resilience may be helpful.** For example, some people write about their deepest thoughts and feelings related to trauma or other stressful events in their life. Meditation and spiritual practices help some people build connections and restore hope.

The key is to identify ways that are likely to work well for you as part of your own personal strategy for fostering resilience.

<http://www.apa.org/helpcenter/road-resilience.aspx>

When we practice
generating compassion,
we can expect to
experience the fear of
our pain. Compassion is
daring. It involves
learning to relax and
allow ourselves to move
gently towards what
scares us.
